

PIONEER® 44C79 (CL)

A CLEARFIELD® BENCHMARK,
PROVEN IN THE Paddock

Pioneer® 44C79 (CL) released in 2008 is a proven early maturity planting partner from Pioneer, ideally suited to short season growing zones. This open-pollinated variety exhibits excellent early plant vigour, high oil content for maturity and adds flexibility for rotational weed management.

AGRONOMIC PROFILE

Maturity	Early-mid season (4)
Recommended growing regions	Low rainfall zones
Yield potential and adaption	High for maturity / target >0.75 to 2.5 t/ha yield range
Blackleg rating	MR*
Blackleg resistance group#	Not screened
Early plant vigour	Excellent
Plant height	Medium
Crop standability	Good
Shatter tolerance	Excellent
Grain oil content	Very high
Grain test weight†	Very good

* Blackleg resistance rating with standard BetaStrike® seed protection. # Provisional resistance group classification from 2012 GRDC screening.
† Minimum canola trading standard is 62 kg/hl [Australian Oilseeds Federation]. Smaller grain rejectable under this limit.

KEY FEATURES

- A widely recognised industry benchmark in the Clearfield class that provides greater choice for effective rotational weed management.
- Recommended planting partner to Pioneer's early maturity Y series hybrids, 44Y84 (CL) and 43Y23 (RR), in low rainfall growing zones.
- More vigorous than Juncea and TT canola offers greater flexibility across the planting window and improves establishment in minimum tillage systems.
- Early-mid maturity (4) with days to maturity up to 4 days quicker than commercially available Juncea canola varieties and similar to 44Y84 (CL).
- BetaStrike seed protection standard to enhance blackleg resistance [MR].
- Very high oil content for maturity adds economic bonus in low rainfall growing zones.
- Wide adaptation and experience as a dual-purpose canola option in low and medium rainfall growing zones where an open-pollinated variety is preferred.
