Pioneer® brand hybrids for Corn Wet Milling

This is the North America **High Extractable Starch (HES)** and **Waxy (WX)** list of Pioneer® brand hybrids. Pioneer has the most aggressive wet milling hybrid-breeding program in the industry to combine high yields/agronomics with processing traits wet millers demand. These products deliver **higher levels of extractable starch**, which allows corn wet miller to produce higher starch yields for production of corn syrups, ethanol and specialty starch products. Please check with your local Pioneer sales professional for availability of specific hybrids from this list in your local area.

HIGH EXTRACTABLE STARCH (HES) HYBRIDS
