

VALIDATION CERTIFICATE

Pioneer Hi-Bred Canada Company validates that the following wheat products were developed using traditional plant breeding without the use of molecular genetic modification techniques. Pioneer sets seed purity standards to ensure that products purchased by our customers are as pure as possible. Pioneer's seed production and testing processes are registered to the internationally accepted ISO 9001:2008 standards for quality management systems. However, grain traits can be mingled mechanically in the grain handling process or genetically in the course of pollination. Thus 100% purity, either in genetic make-up or in the absence of foreign material content is currently not achievable for any agricultural product, including wheat seed.

25R25, 25R34, 25R39, 25R40, 25R46,
25R61, 25R74, 25W31
