

**NUTRIENT EFFICIENCY
BIOSTIMULANT**

2023 Program

Utrisha™ N provides crops a unique way to capture nitrogen throughout the season, helping plants reach their yield potential.

What is Utrisha N?

Utrisha N is a nutrient efficiency biostimulant. The natural bacteria, methylobacterium symbioticum, **fixes nitrogen from the air and converts it into a usable form for the plant.**

Utrisha N provides a sustainable, alternative source of nitrogen that reduces dependency of nitrogen uptake from the soil and ensures the **plant has access to nitrogen all season long**, without the risk of leaching into water tables or releasing additional greenhouse gases.

2021 Field Trial – Lenore, MB

And now, you can receive \$1/acre savings on Utrisha N.

**Try a minimum of
120 acres of Utrisha N**

\$1.00/acre

Eligible program period: September 1, 2022 – August 31, 2023.
Acres are calculated using registered application rates.
Savings will be applied as a discount to your Pioneer account with proof of purchase.
Always read and follow label directions.
