

NEXTA™ » SHARP

NEXTA™ SHARP provides two essential growth-promoting plant hormones to optimize crop development and yield. NEXTA SHARP contains indole-butyric-acid (IBA) for fast, vigorous root growth and cytokinin for optimal vegetative and reproductive development. NEXTA SHARP is a CFIA registered yield stimulant and plant growth regulator.

Crops*:

Cereals, canola, **corn**, soybeans

Product Features and Benefits:

- Contains key ingredients to optimize season-long plant development, leading to higher yield.
- Enhances cell division and nutrient uptake to boost root growth, setting the stage for maximum yield.
- A CFIA-registered yield enhancer product, NEXTA™ SHARP enhances naturally occurring hormones within the plant to optimize genetic expression.

Ingredients:

| | |
|-----------------------|-------|
| Cytokinin, as kinetin | 0.15% |
| Indole-3-butyric acid | 0.85% |

Recommended Application Timing:

Start (In-furrow)
Grow (Foliar at herbicide timing)

Application rate:

In-furrow or foliar rate: 65 mL/ac

Water Volume:

Ground: minimum 40 L/ac (10 US gal/ac)

Product size:

2 x 10 L case
1,000 L tote

*see label for additional crop registrations
