

NEXTA™ STILT

NEXTA™ STILT is a first-of-its-kind blend of key plant growth hormones, potassium silicate, and salicylic acid designed to enhance stress tolerance, boost photosynthetic efficiency, and improve root and shoot development while strengthening stalk integrity during critical growth stages. Nexta STILT primes the plant's own immune system early in the season to optimize health and growth. By activating natural defense mechanisms, it increases disease protection and fortifies plant tissues, helping crops better withstand extreme weather conditions such as cold, heat, drought, and wind – while improving nutrient and water use efficiency for stronger, more resilient plants.

PRODUCT FEATURES/BENEFITS

Strengthens Cell Walls

With a proprietary formulation containing auxins (IBA), cytokinins (kinetin), potassium silicate, and salicylic acid, NEXTA STILT helps plants better withstand environmental stress and improves stalk structure integrity by strengthening the plant's cell walls.

Boosts Plant Immunity

NEXTA STILT boosts the plant's systemic acquired resistance (SAR) with salicylic acid, helping plants precondition for stress and disease pressure. The result: increased resilience against disease impact to help maximize yield potential.

Easy To Apply

Apply product during growth stages V3-V6 to mitigate stress and preserve yield. Mix it in the tank with herbicide, fungicide, or insecticide applications.

Backed by the Best

Pioneer now offers an EPA-registered foliar salicylic acid product to maximize yield potential – ag innovation you can trust.

ACTIVE INGREDIENTS

Indole-3-Butyric Acid (IBA)	0.40%
Kinetin	0.20%
Salicylic Acid	2.50%
Potassium Silicate	10.50%
Other Ingredients	86.40%

RECOMMENDED FIELD APPLICATIONS

Foliar

RECOMMENDED RATE & TIMING

Corn: 4 fl oz/A at V3-V6

CONTAINER SIZE

2 x 2.5-gallon container
275-gallon mini bulk
