

# PIONEER® BRAND ALFALFA WITH ROUNDUP READY® TECHNOLOGY

Pioneer® brand Roundup Ready® alfalfa varieties help bring simplicity to your alfalfa weed management system. By easily managing weeds during seedling establishment alfalfa plants grow vigorously and without weed competition, resulting in more pure alfalfa forage starting with the first harvest. Roundup Ready® alfalfa varieties give you the flexibility to control weeds all stand long.

## THE ADVANTAGES

### EASIER WEED CONTROL, MORE FLEXIBILITY

Early weed control in alfalfa is excellent using a single glyphosate application when alfalfa is just inches tall. Flexibility means you can spray glyphosate herbicide at anytime during the life of the stand to control weeds.

### BETTER CROP SAFETY, GREATER YIELD POTENTIAL

Glyphosate herbicides are safe for the crop and maintain higher yield potential compared to conventional herbicide control systems.

### MORE PURE ALFALFA, BETTER QUALITY

Fewer weeds and more pure alfalfa forage beginning in year one means high forage quality potential from your alfalfa stand.

## ELITE PIONEER® BRAND GENETICS

### HIGHEST YIELD POTENTIAL

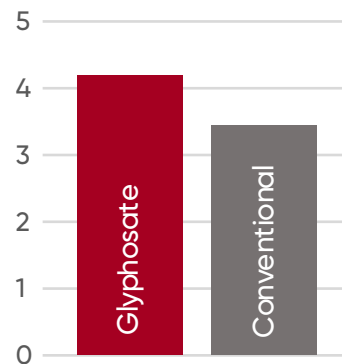

Pioneer brand alfalfa varieties with Roundup Ready resistance have the highest yield potential of any alfalfa varieties in our line-up.

### DISEASE AND PEST RESISTANCE

Yield and persistence start with the best root rot and nematode resistance in the industry, protecting plants during establishment and for the life of the stand, even in challenging growing environments.

### 35% MORE ACRES IN EVERY BAG

Light seed coat technology means more pure live seed in every bag of Pioneer brand alfalfa seed, reducing total costs of establishment.

Forage yield advantage for alfalfa in the seeding year using Roundup Ready alfalfa with glyphosate herbicide versus conventional herbicides.

## MAXIMIZE THE PERFORMANCE OF YOUR ALFALFA

with Pioneer® brand inoculants, designed to get more mileage from your alfalfa silage crops. **Pioneer® inoculant 11H50** is an alfalfa silage inoculant designed to speed up fermentation, reduce protein degradation and improve dry matter recovery.

Do not export Pioneer® brand alfalfa seed or crops containing Roundup Ready® alfalfa technology including hay or hay products, to China pending import approval. In addition, due to the unique cropping practices, do not plant this product in Imperial County, California. Always Read and Follow Pesticide Label Directions. Alfalfa with the Roundup Ready® alfalfa technology provides crop safety for over-the-top applications of labeled glyphosate herbicides when applied according to label directions. Glyphosate agricultural herbicides will kill crops that are not tolerant to glyphosate. **ACCIDENTAL APPLICATION OF INCOMPATIBLE**

### HERBICIDES TO THIS VARIETY COULD RESULT IN TOTAL CROP LOSS.
