

Granular Digital Solutions

Your farm isn't one size fits all. Neither is our technology. Granular's integrated digital tools and services provide vital financial and agronomic insights to help you realize greater profitability across your operation.

Granular Insights

Drive profitability with existing data

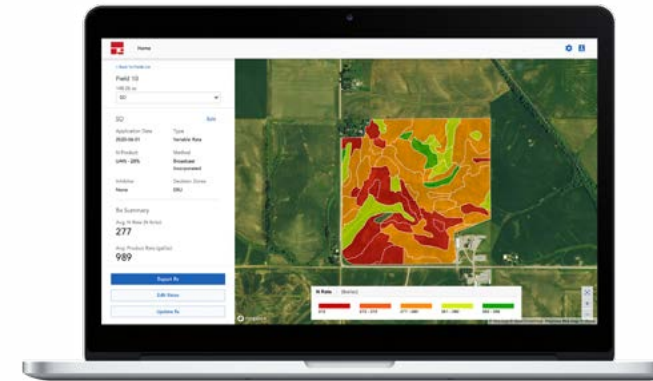

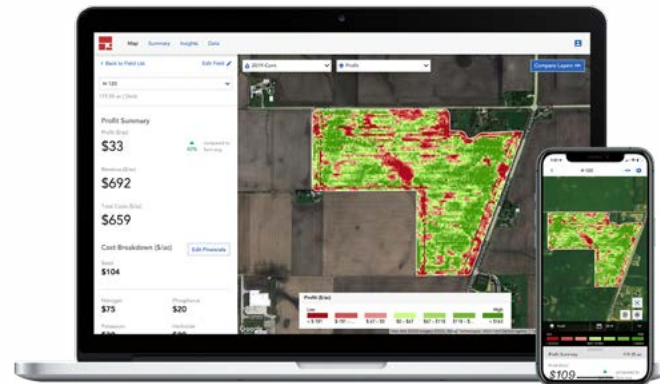

- Free digital tool for web and mobile.
- Automatically combines planting and yield data with estimated revenue and cost so you can see what's working and which acres are holding you back.
- Compare profit, soil type, variety planted and more with straightforward, side-by-side agronomic and financial map layers.
- See the yield impact of harvest moisture and planting date with simple charts and summaries.
- Easily upload yield and planting data from 10+ manufacturers, plus wireless sync with John Deere Operations Center.
- Snap and share geolocated notes and photos with advisors and team for easier collaboration.

Paid feature:

+Directed Scouting

Catch and correct issues earlier with near daily, 3-meter resolution satellite imagery and weekly scouting email alerts.

GPS-powered technology pinpoints your exact field location to save time in the field.
